 - a) All
 - b) Some*
 - c) None
 of the:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) hereto or 2) to Paper No./Mail Date _____.
 - (b) including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Prior Art Citation

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Van Vlerken et al. (2004/0213119), Tobita (2005/0073923) and Iida (5,689,482), all disclose a recording and reproducing apparatus having the ability of generating clock information based on a phase modulated signal from the recording medium.

Reasons For Allowance

2. The following is an Examiner's Statement of Reasons for Allowance:

Re claims 1-10

The prior art of record alone or in combination does not teach or suggest the clock generator for generating a non-phase modulated target clock signal based on a phase-modulated input signal having the combination and function of recited elements, and taken the claims as a whole in combination with having the target clock signal being generated based on the oscillation signal, when the first protection signal corresponds to a first logic level, the phase-locked loop compares the target clock signal with the input signal to drive the target clock signal to be synchronized with the input signal, and when the first protection signal corresponds to a second logic level, the phase-locked loop holds the target clock signal without driving the target clock signal to the synchronized with the input signal, as set forth in claims 1-10.

Re claims 11-19

The prior art of record alone or in combination further does not teach or suggest the clock generating method for generating a non-phase-modulated target clock signal based on a phased-modulated input signal having the combination of steps with their recited process, and taken the claims as a whole along with having a cycle value being generated by calculating the number of cycles of an oscillating signal during a cycle of the input signal and the logic level of the first protection signal is determined by comparing the cycle value with a preset cycle value, as set forth in claims 11-19.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
